

JOBBS

From the students that I have talked to, it sounds like the job shadowing experience went well! I have received a few of the host evaluations - all were great! I knew I could count on you to represent our school in a positive manner and act with the upmost professionalism. Thank you! In order to continue and improve this program, we need your honest input. Please write about your experience yesterday and use Google Docs. Please answer the following questions in complete sentences using specific details. Since I didn't experience what you did on Friday, please don't assume I know what you are discussing - the more details, the better the grade.

Where was your job shadowing, and what time did you start? How long was your shift? What were three things you learned about this career that you didn't know before? You may include any advice your host had for you. What would be at least two perks working for this company? After Friday's experience, is this a career you would like to pursue? Why or why not (please explain)? If the answer is yes, what type of education or experience will you need in the upcoming future? If the answer is no, what other career are you now considering? Do you believe job shadowing to be a valuable experience for students? Why or why not? Overall, was Friday a positive experience for you? Why? What was your favorite thing? What advice would you give to students who will be job shadowing next year for the first time? What can administration or I do to improve this program for upcoming students? Please explain in detail.

Please proofread your work. These will possibly be shared with administration and school board members. This assignment is worth 100 points and is also graded as a test. You will also need to print off a copy and turn it into the basket. This is due by Thursday. Tomorrow we will be writing thank you cards to your different companies. I will provide all of the materials.
